

2024 Fall Benefit Sponsorship Opportunities

PowerMyLearning is a national nonprofit that launched programming in Los Angeles in 2008. We work hand-in-hand with educators to foster equitable learning environments that empower each student to thrive academically, socially, and emotionally. PowerMyLearning provides math-focused professional learning services to K-12 teachers and school leaders so they can support their students in mastering grade-level math content while fostering the skills for life-long math success. Our early-grade math program combines professional learning with a math practice tool, Family Playlists®, to enhance instruction, with a special focus on promoting math discourse, supporting multilingual learners, and engaging families. PowerMyLearning has more than two decades of experience working in historically marginalized communities and has achieved statistically significant outcomes on academic achievement, social emotional learning (SEL), and teacher practice.

Empower Los Angeles' future with PowerMyLearning.

Help us ensure that LA students are thriving academically, socially, and emotionally by sponsoring critical services to a school in Los Angeles County. Many schools across Los Angeles County want to partner with us but lack the necessary funding to bring our programs to their campus.

Why sponsor a school with PowerMyLearning?

Foster Parent Engagement: Strengthen family involvement in education.

Empower Students: Help students improve their math scores.

Build Teacher Capacity: Ensure teachers have the support they need to unpack their curriculum and implement instructional best practices.

Sponsorship Levels:

\$15,000 Accelerate Math Learning in Early Grades

Provide all K-2 classrooms in an elementary school with access to PowerMyLearning's Family Playlist tool and implementation supports for a year.

\$10,000 Nurture Student Growth through Social Emotional Learning

Provide teachers and paraprofessionals with actionable, research-based strategies to accelerate learning and grow students' SEL Skills.

\$5,000 School Leadership Development

Provide a school principal with executive coaching to build skills to lead with confidence and focus on strategies to accelerate student learning school-wide.

\$2,500 Collaborative Learning Series

Provide a K-2 grade team with an opportunity to deepen their understanding and explore research-based strategies around core math topics including math discourse, number sense, and student mindsets.
